

**SPECIFICATIONS:**

**Interface:**

Video: 3x RCA (Y/Pb/Pr) female connectors  
110-type rear punchdown

**Impedance:**

Video: 75 ohm unbalanced  
UTP: 100ohm balanced

**Bandwidth:**

Video: DC~60 MHz

**Distance:** Over Category 5e/6 UTP cable:

- 480p video, up to 100 meters (total length, device-to-device)
- 720p video, up to 75 meters (total length, device-to-device)
- 1080i video, up to 50 meters (total length, device-to-device)

**IMPORTANT**

- Do not route audio/video cables through the same cable holes as the AC power cables.
- For safety, all audio/video cables should be separated from parallel AC power lines by at least 6 inches whenever possible.
- Avoid kinking the cable.
- Do not attach cable tie-downs too tightly. The cable fastening hardware should not compress the cable sheath.
- Do not bend the cable sharply. Be especially careful to dress the cables properly after passing them through a hole as the edges of the hole can compress or even damage the cable sheath.

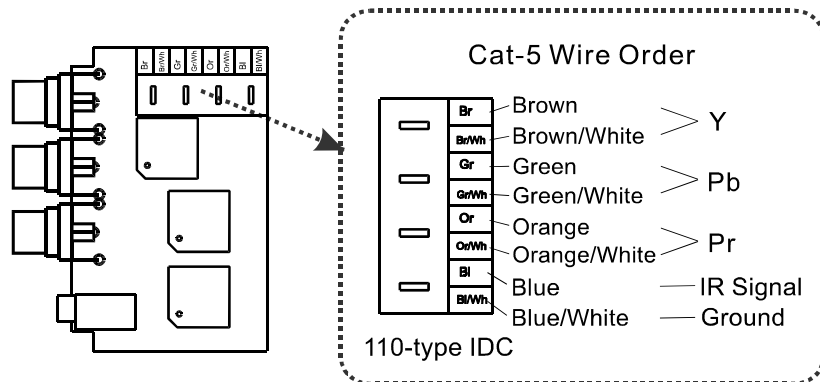

- Follow all warnings on the products.
- For your safety, do not use this or any electrical product near water (unless specifically designed for wet areas).
- Do not install wiring during thunder and lightning storms.
- Use caution when handling or installing any computer, telephone, video, or electrical devices.

**INSTALLATION**

1. Strip off approximately 2" of the Category 5e cable jacket, using the appropriate cable stripping tool.
2. Separate the pairs according to color (Brown/ Brown- White, Green / Green-White, and Orange /Orange-White).
3. To terminate, place each wire into the insulation displacement contacts (IDC) by matching the wire color with the applicable colors on the punchdown block (see the figure below).

**TIP:** We recommend untwisting the pairs no more than 1" from termination point.

4. If using a 110-type punchdown tool, place the tool over each wire with the cutting blade facing outside of the IDC and punch down firmly.
5. Repeat this process with each pair.
6. Install included termination caps firmly onto the IDC.
7. Fasten insert and wallplate to electrical box using supplied screws.

**◆ Dual Band Surface Mount Mini IR Receiver**

**Features**

1. CFL friendly--allows installations in areas with compact fluorescent lighting. Works in most lighting environments.
2. Blue IR confirmation LED.
3. Wide band IR receives IR from many types of remotes.
4. Self-adhesive tape for quick and easy fixing on any flat surface.
5. 3 meters cable with 3.5mm stereo mini-plug.

**Specifications**

Receive Frequency Range..... 34 kHz to 60 kHz  
 Transmit Frequencies..... 38 KHz & 56 kHz  
 Range..... 40ft. @ 38 KHz  
 .....25ft. @ 56 KHz  
 Power.....12VDC, 31mA max.  
 Dimensions..... 45L x 14W x 13H mm  
 Cord Length.....10ft (3m)  
 Connector Type.....1/8" (3.5mm) TRS mini plug  
 Weight.....28 g

**◆ Dual IR Emitter**

**A. Standard installation**

1. IR emitter attached directly to IR sensor window.
2. More reliable activated

**B. Attach emitter at inside of shelf**

1. Attach emitter on above or below of the IR sensor.
2. Less reliable activated.

**C. Cabinet with door installation**

1. Attach emitter on door, round shape facing the IR sensor.
2. Less reliable activated.
